ViewSonic Corporation Company Profile

ViewSonic has a display for every occasion. The company makes CRT and LCD computer displays, including the Professional Series for high-end computer-aided design, desktop publishing, and graphic design; the Graphics and E2 lines for homes and small offices; and the A Series for replacing monitors included in bundled systems. ViewSonic also offers LCD and plasma TVs, wireless networking equipment, LCD projectors, handheld computers, and tablet PCs. CEO James Chu, who founded ViewSonic in 1987, is the company's majority owner. ViewSonic has also received financing from the venture capital arm of chip giant Intel, which partnered with the company to develop inexpensive chipsets for high-definition TV.

Overview

Headquartered near Los Angeles in Walnut, Calif., ViewSonic Corporation has quickly become a leading global provider of visual display products.

Since its inception in 1987, ViewSonic® has consistently grown and evolved its business, finding new ways to add more value for its customers. In its first ten years, the company focused primarily on selling **CRT monitors** to businesses. To make the customer's visual experience easier and more enjoyable

ViewSonic expanded its product line to include **LCD monitors, LCD TVs, projectors, plasma displays** and **peripherals**, as well as advanced mobile and wireless products, such as **tablet PCs** and **wireless displays**. Today, the company offers comprehensive visual display solutions for business, education, consumer electronics and professional markets.

ViewSonic is committed to meeting and exceeding its customers' expectations in quality, value and innovation to deliver the utmost in visual experiences. The company remains one of the leading monitor display companies in the United States* and has won more than 2,000 awards from independent global publications and has leveraged its display expertise to develop the first products in several new industry categories. ViewSonic is the "Choice of Professionals" with over 25 million users worldwide and the most recommended computer display brand in the United States. The company's annual sales have risen from \$4 million in 1987 to more than \$1 billion in 2004.

* Leading stand-alone, branded monitor by sales (CRT and LCDs combined; iSuppli/Stanford Resources Monittrak® and Flat Panel Monittrak®, 1998-2004 reports).

Visual Revolution

ViewSonic has been leading the Visual Revolution in support of the world's transformation from analog to digital and "PC-centric" to "Display-centric" society. ViewSonic's comprehensive line of leading visual display products, whether on the desk, on the wall or in the hand, is revolutionizing how users rely on display technology as the focal point for accessing and controlling information and entertainment.

Market Philosophy

ViewSonic is committed to meeting and exceeding its customers' expectations in quality, value and innovation. Its ability and dedication to deliver products to the market ahead of the competition remains a primary focus of the company. Unlike some of its primary competitors, ViewSonic is exclusively devoted to the visual display products business, which enables the company to better

focus its resources.

[[back to top](#)]

The ViewSonic Birds

When designing a logo for the company, ViewSonic Chairman, CEO and Founder, James Chu, sought to develop a powerful brand image that would denote superior quality and attributes such as brilliant color and sharp resolution. Chu began searching for a symbol that would achieve these objectives while projecting friendliness, comfort and value. The three Gouldian Finches that form the ViewSonic logo have become a well-recognized symbol of excellence. Consumers around the world now associate them with the attributes that characterize the company: unique, superior quality, vibrant, warm and friendly. [Learn more.](#)

ViewSonic not only symbolizes these rare birds through its logo, but also honors its association by sponsoring the Adopt A Bird program on LadyGouldianFinch.com. To adopt one of these wonderful birds or learn more, [click here](#).

[[back to top](#)]

ViewSonic as Technology Provider

A large part of ViewSonic's success stems from an innovative production approach that enables the company to design, produce and distribute its products faster and more cost effectively than competitors. Rather than adopting traditional, slower processes, ViewSonic has developed a business model that allows the company to quickly match advanced technologies from research laboratories around the world to market demands. This model has resulted in a series of ViewSonic technology innovations from SuperClearMVA™ and PerfectFlat® displays, to the groundbreaking [wireless displays](#) and [Media Networks](#).

[[back to top](#)]

Visual Technology Products

The ViewSonic product line is divided into six distinct categories: [Desktop Displays](#), [TV/Entertainment Displays](#), [Plasma Displays](#), [Projectors](#), [Mobility](#) and [Peripherals](#).

[\[back to top \]](#)

Desktop Displays

Building from its expertise in cathode ray tube (CRT) technology, ViewSonic has developed a broad line of award-winning CRT and LCDs displays.

Since the introduction of LCD technology, ViewSonic has led the market transition to flat panel displays, delivering a leading product line that meets a variety of customer needs. ViewSonic LCDs offer high performance in environments where space is limited, such as the corporate, government and financial markets.

ViewSonic offers CRTs that incorporate the latest in technology, from PerfectFlat® screens and digital video to multimedia versatility and Internet-ready color.

[\[back to top \]](#)

TV/Entertainment Displays

ViewSonic has extended its visual display product leadership to television and entertainment products with award-winning **projectors**, **LCD TVs** and **TV/video processors**. ViewSonic's ultra-slim, HDTV-ready **plasma displays** bring images to life with exceptional brightness and depth. With a clean, professional look, ViewSonic digital displays are ideal for videoconferencing, multi-format presentations, public signage and home theater. From micro-portable projectors to high-resolution, large-format LCD TV and plasma screens, ViewSonic raises the standards for TV and entertainment technology.

[\[back to top \]](#)

Projectors

Perfect for high-profile boardrooms, presentations on the road, classrooms or the living room, ViewSonic **projectors** are essential tools for any presentation environment. The complete line of LC and DLP projectors deliver vibrant, rich colors with life-like depth, even in well-lit rooms.

[\[back to top \]](#)

Mobility

Streamline workflow, improve productivity and work anywhere, anytime with ViewSonic's line of mobility. Innovative **wireless displays** offer a new look at computing. In addition, ViewSonic's line of **wireless media networking** products offers the only complete solution that enables consumers to store their digital videos, music and photos in one location and wirelessly distribute them to any TV or stereo in their home or at the office.

[\[back to top \]](#)

Peripherals

ViewSonic's ViewMate® Desktop Collection helps enhance the user's experience. From **speakers** to

keyboards and mice. ViewSonic has the products to complement its complete line of visual display products.

[[back to top](#)]

Service & Support

ViewSonic is devoted to customer satisfaction and is committed to building positive relationships with every company and individual it interacts with. ViewSonic strives to understand interests and concerns, and treat people with respect, courtesy and consideration. ViewSonic's customer and technical support is available 24-hours a day, seven days a week, excluding major holidays. By calling, 800-688-6688, customers are greeted by a trained ViewSonic support expert, who can assist in solving questions on warranties, troubleshooting, etc. ViewSonic has also made frequently asked questions and product information available on this web site to support the efforts of its customer service hotline.
